

# Project overview

The Western Renewables Link is a proposed new 190km overhead high-voltage electricity transmission line that will carry renewable energy from Bulgana in western Victoria to Sydenham in Melbourne's north-west.

The project is critical infrastructure required to unlock the renewable energy potential of western Victoria as a key Renewable Energy Zone and will help to deliver clean and affordable energy to Victorians.

# Project timeline

## Planning and approvals

Commence stakeholder engagement  
Early-2020

Commence formal  
approvals process and  
community engagement  
Mid-2020

EES public exhibition

Panel public hearing  
Q4 2025 – Q1 2026

Minister's assessment  
Q2 2026

Planning scheme  
amendment gazettal

Ongoing engagement with landholders and community

Construction timelines will be updated once the EES program is finalised.
