

Sydney Gateway

Work update

December 2023 and January 2024

Sydney Gateway will provide a new, toll-free connection from St Peters Interchange to improve journey times to Sydney Airport, the M5 and Eastern Distributor.

Our work in December 2023 and January 2024 includes:

Work near the Domestic Terminals

Construction of the Deborah Lawrie Flyover is now complete. It opened to traffic in the early hours of Sunday 12 November.

- Landscaping, linemarking and removal of temporary road widening measures.
- Finishing asphaltting along Qantas Drive, Joyce Drive, Sir Reginald Ansett Drive, O'Riordan Street and Robey Street.
- Testing traffic signals and signage with the new traffic flows.
- General site clean-up and demobilisation of the site compound.

We are changing how you move around the Airport Precinct.

Scan the QR code to learn more about our traffic changes and watch our latest video.

Work near the International Terminal

Work continues on the southbound Twin Arch Bridge before it opens to traffic next year.

- Finishing works on the southbound Twin Arch Bridge including deck pours and removal of the temporary teal struts.
- General road finishing works on Airport Drive including out-of-hours activities.

Holiday Shut Down

Most work on the Sydney Gateway project will stop between **6:00pm, Friday 22 December 2023 and 7:00am, Monday, 8 January 2024.**

You may see security on our sites throughout this period as well as people entering our sites to check and maintain equipment.

During the shutdown period there may be delivery of materials and equipment to some of our sites and concrete works (deck pours) on the southbound Twin Arch Bridge at Tempe and the bridge to the east of Nigel Love Bridge. At Tempe, there will be some daytime utility installation work between **Tuesday 2 and Saturday 6 January 2024.**

and learn more about our work activities

Tempe and St Peters

Noise barrier construction at our Tempe site continues.

- General road, earth and utilities work within the Tempe and St Peters site. This includes concrete pours, drainage works, asphaltting and line marking as well as installation of traffic barriers, lights, gantries, and signage. Some of these activities will be done out-of-hours.
- Installing power to the pedestrian cycle path from Tempe Recreation Reserve.
- Finishing works on the noise barriers at Tempe.
- Landscaping the Tempe site. This includes construction vehicles accessing the Tempe site via Holbeach Avenue between 9:00am - 4:30pm (Monday - Saturday).
- Finishing works on the bridge across Canal Road, St Peters including laying the final road surface. Out-of-hours works will continue, as required, on Canal Road with temporary overnight lane closures and traffic contraflows.

How our work may impact you

We'll use plant and equipment that includes hand tools, welding tools, cranes, grinders, excavators, piling rigs, elevated work platforms, vacuum trucks, ground compactors, vibratory rollers, asphalt pavers, jack hammers, road saws, rattle guns, chain saws, traffic management tools and construction vehicles.

We'll minimise noise associated with this work by using non-tonal reversing beepers on machinery, turning off equipment and vehicles when not in use, using noise mats and noise shielding, where feasible, directing noisy equipment away from properties and other on-site noise reduction measures.

Across multiple locations

Construction and finishing works on the pedestrian and cycle path.

- Installing drainage under some of the bridges over the Alexandra Canal. This work will be done from the water and means the temporary closure of sections of the Alexandra Canal.
- Oversized delivery and removal of structures, materials, and equipment at our work sites in Mascot, Tempe, and St Peters. This will include out-of-hours heavy vehicle movements, lifting activities and concrete pours.
- Landscaping and finishing works across the project.
- Continuing construction and finishing works on the pedestrian and cycle path. This includes intermittent narrowing of the path under stop-go traffic control and occasional night-time path closures with an on-demand bus service provided.

Our work hours

Our standard work will take place during the day from **7am to 6pm Monday to Friday** and from **8am to 6pm on Saturdays**. We'll also be working at night usually up to **3 nights a week between 6pm - 7am**.

Some of our work may be done outside of these hours when it's low impact, required for safety reasons or prescribed by regulatory authorities. This includes Sydney Airport regulations which require the use of large cranes and other oversized equipment to be used at night when planes are not using the Airport.

Traffic (including pedestrians and cyclists) conditions will change while we're working. Please plan ahead and follow the direction of traffic controllers.
