

Ongoing construction of the shared pedestrian and cyclist pathway between Kings Road and Bruce Street

M6 Stage 1

February 2025

Transport for NSW acknowledges the Bidjigal, Dharawal, Gweagal and Gadigal clans of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

As part of the M6 Stage 1 project, construction of the shared pedestrian and cyclist pathway continues in February 2025.

Once the pathways are constructed, there will be renewed natural landscapes, green spaces, and recreational facilities for the community to enjoy.

When and where we'll be working

Work is ongoing between Kings Road and Bruce Street. Our standard work hours are from **7am to 6pm, Monday to Friday and 8am to 6pm, Saturday**.

What work are we doing?

- Maintaining environmental controls to manage erosion and sediment.
- Tree pruning, and vegetation and tree removal.
- Delivering and removing of materials such as gravel, sandstone, concrete, reinforcement.
- Ongoing earthworks and commencement of landscaping work.
- Establishing the foundation for the internal haulage road and shared pedestrian and cyclist pathway between Bay Street and Bruce Street, including the use of a roller.

- Formwork and pouring concrete footpaths, kerbs, and slabs.
- Excavating for underground utility conduits and light pole footings for future pathway lighting.
- Excavating for, and installing, new drainage and pipes.
- Investigating existing underground services.
- Delivery and relocation of oversized plant equipment.

Our equipment includes excavators, tippers, saw cutters, piling rig, concrete pumps, concrete trucks, concrete saws, cranes, compactors, rollers, telehandlers, mulchers, stump grinders, vac trucks, hand tools, trucks, and light vehicles, such as utes.

What will this mean for you?

During our work, you may notice:

- vehicles entering site via Bruce Street, Bay Street and Kings Road
- temporary traffic and pedestrian changes when we are working close to the footpath or road

- intermittent periods of vibration from the use of compactors and rollers, and noise from machinery and equipment.

Managing our impacts

We will manage dust by using a water cart and manage noise by using squawkers instead of beepers on vehicles and turning off equipment and vehicles when they are not being used. We monitor dust and noise levels to measure our impact to the local community.

Respite for one hour will occur every three hours during high impact day activities. High impact work on Saturday will finish by 1pm.

Please follow our traffic signs and the directions of the traffic controller when we are working close to the footpath or road.

Kings Wetland boardwalk

Work continues in February to construct the shared pathway either side of Kings Wetland boardwalk. Once complete, the shared pathway will connect residents from Kings Road to Bay Street, making the previously impassable area, accessible to the community.
