

M6 Stage 1

Utility investigations at Francis Avenue, Brighton Le Sands from Thursday 28 October 2021

About the M6 Stage 1

The M6 Stage 1 will connect President Avenue at Kogarah to the M8 at Arncliffe via a four kilometre twin tunnel, linking southern Sydney to the wider motorway network.

Latest Update

In response to the submissions, we received during the public exhibition of the Environmental Impact Statement, we have listened to your feedback and we are updating the design of the shared pedestrian and bicycle pathways. We are currently undertaking investigations in your area that will inform the final design.

Between Thursday 28 October and Wednesday 3 November, we will commence utility investigations at Francis Avenue, Brighton Le Sands.

What does our work involve?

Our work involves using ground-penetrating radars and potholing to locate existing utilities under the ground.

Our work will include:

- setting up the investigation area and locating utility services and connections
- opening small sections of the road with a concrete saw
- removing ground materials with a vacuum truck
- installing underground CCTV investigations
- reinstating the area.

Our equipment will include a concrete saw, vacuum truck, light vehicles, and a compactor.

Our work schedule

Our work will take up to one day to complete during a period between Thursday 28 October and Wednesday 3 November.

Our standard construction work hours are:

- **7am to 6pm, Monday to Friday**
- **8am to 1pm, Saturday**

The date and timing of work is subject to change depending on the weather and site conditions.

A map of our work area is shown over the page.

How will our work affect you?

Our work is expected to create some noise when we are cutting into concrete and using a vacuum truck. We will reduce our noise by turning off equipment and vehicles when they are not being used.

For the safety of our workers and the community, we will need to make temporary traffic changes during our work. Please follow our traffic signs and directions of our traffic controllers.

We will temporarily remove some on street parking during the work. Parking will be reinstated once work is complete. Traffic control will be in place to assist pedestrians and cyclists. Access to properties will be maintained at all times.

We will notify residents impacted by parking removal 24 hours before work begins.

How are we keeping our sites safe?

The safety and wellbeing of the wider community and our workers is our highest priority. We are working closely with our contractors to make sure COVID safe plans are in place and we are following current NSW Government Public Health Orders.

How will we continue to communicate with you?

We will continue to inform the community in advance about work activities via community notifications delivered to your letterbox.

If at short notice there is a change to the timing of our work, we will provide updates on the M6 Stage 1 interactive portal.

We understand some activities may cause disruption to the local community and we thank you for your co-operation as we undertake this important work.
