

Community engagement

An important part of the Western Renewables Link is our ongoing engagement with the community. Community input is critical to all major projects to ensure that all issues are considered in the planning, approvals and design phases.

Community and landholder input is collated and provided to the technical specialists working on the impact assessments for the Environment Effects Statement (EES), the proposed route, and design of the transmission line and associated infrastructure.

The project team also considers all feedback provided to improve our communication and stakeholder engagement activities. This has resulted in our improved online interactive map with cadastral layers, and production of fact sheets on issues pertinent to the community like bushfire.

Provide feedback on the proposed project or register for project eUpdates by submitting the feedback form.

We appreciate you taking the time to share your feedback with us.

Community engagement events

Engaging with the community to ensure local voices and concerns are considered in the planning, approvals, and design phases is critical.

In addition to direct correspondence, our project website and virtual engagement room, eUpdates and advertising, our project team endeavours to inform and engage with communities, landholders and stakeholders through face-to-face events and webinars.

You can find upcoming events in the **Events** section on our website and previous webinar recordings can be found on our **Resources** page.

Fast facts

Community support services

AusNet Services acknowledges the uncertainty and concern around the Western Renewables Link, particularly for potentially affected landowners and communities.

We encourage anyone struggling with challenges to their own, a friend or a family member's mental health and wellbeing, to contact one of the independent support providers listed below for free and confidential advice.
