Beaches Link and Gore Hill Freeway Connection

Frenchs Forest temporary construction support site

This fact sheet outlines the key construction activities, timelines and the potential temporary construction impacts in your local area as outlined in the EIS. We encourage you to visit our interactive portal for more information, our interactive map, videos and to view the full EIS chapters.

We will be setting up a temporary construction support site on Wakehurst Parkway at Frenchs Forest to support surface road work, intersection work and to build a permanent tunnel support facility. This site was recently used as a construction site for the Northern Beaches Hospital road upgrade.

Any areas that have been rehabilitated and returned to the community from the road upgrade project will not be used for Beaches Link. The rehabilitated area will be fenced off and protected from our work.

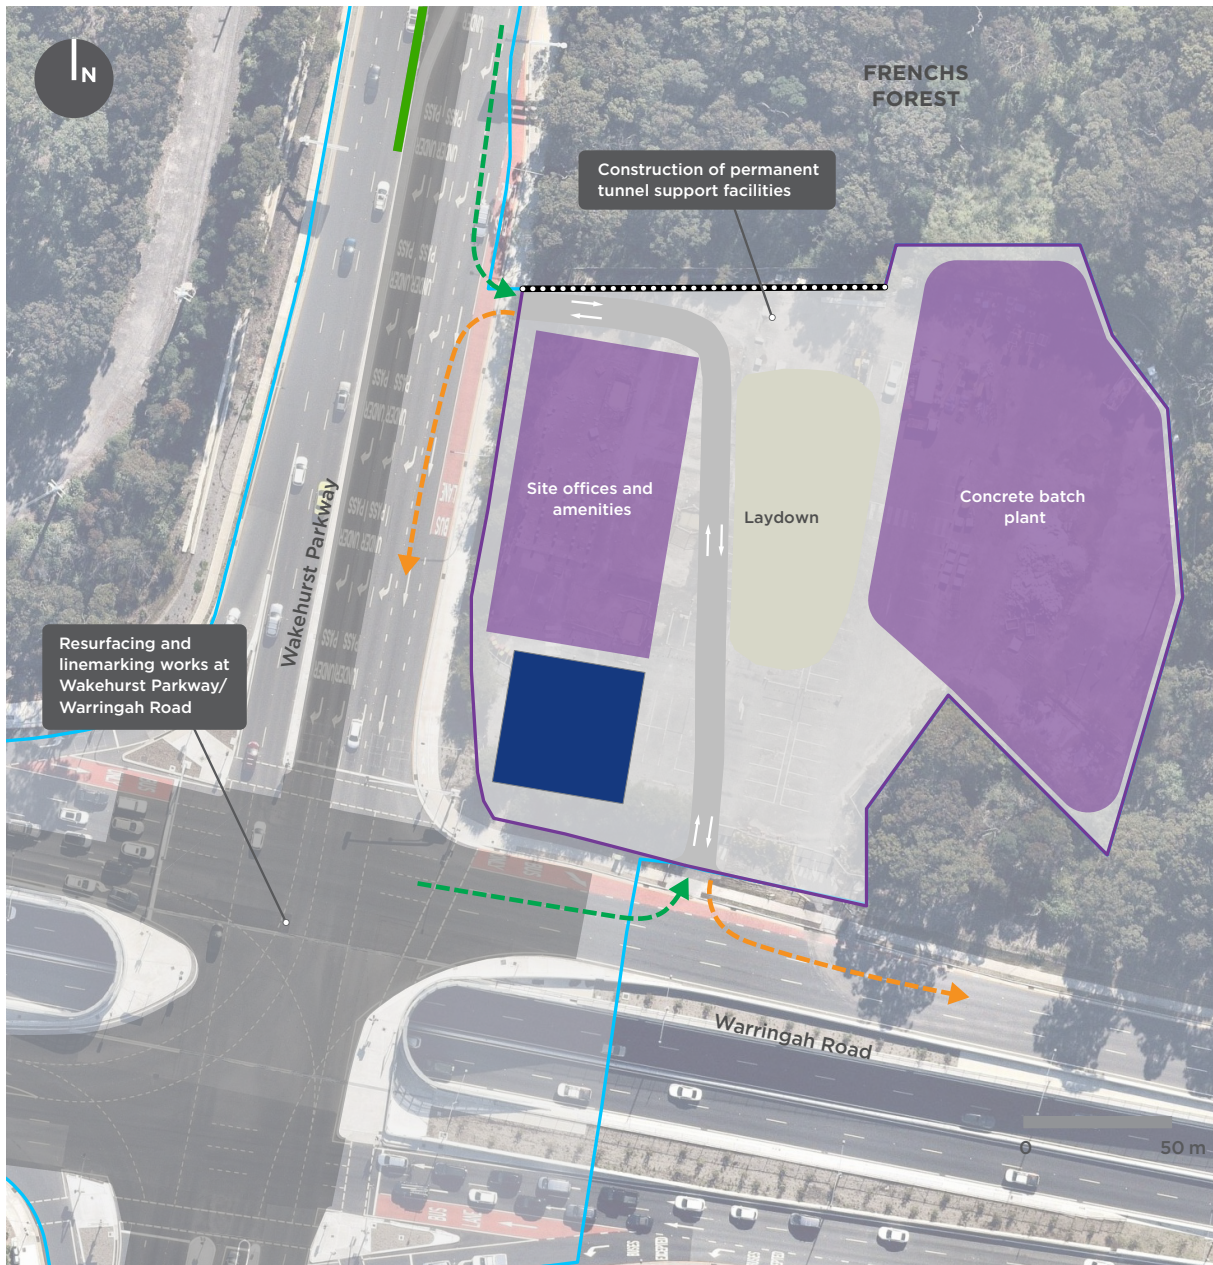

Our key activities include:

- building and operating the temporary construction facilities, including a temporary noise barrier, staff offices and amenities, car parking and concrete batch plant
- supporting construction of the Wakehurst Parkway surface road work, minor intersection work at Wakehurst Parkway/Warringah Road and Wakehurst Parkway/Frenchs Forest Road East and construction of the permanent tunnel support facilities.

Protecting revegetation

The same site was used as the main construction support site for the Northern Beaches Hospital road upgrade project, which was completed in August 2020. Revegetation work was carried out within the Northern Beaches Hospital road upgrade project's main construction support site as part of decommissioning. This included planting with species consistent with the Duffys Forest endangered ecological community within the eastern section of the decommissioned construction support site.

During site establishment of the Wakehurst Parkway North temporary construction support site, this revegetated area will remain fenced off and protected from disturbance. Due to the timing of this recent revegetation work, the current site layout of the Wakehurst Parkway North temporary site does not show the revegetation area. During further design development and construction planning, the temporary site layout will be refined to show the revegetation area, and ensure it is avoided and protected during construction.

Wakehurst Parkway North temporary construction support site indicative construction program

Construction activity	2023	2024	2025	2026	2027
Early work and site establishment	■				
Surface road works	■				
Construction of operational facilities			■		
Testing, commissioning and site rehabilitation					■

Duration

You may see us in this area for up to five years as we setup, carry out our construction work, then demobilise the site and rehabilitate it for future use.

The construction peak at this site will be when we are carrying out surface road works and will be up to four years.

Hours of work

Our general site activities will be carried out during standard construction hours.

There may be occasional night staging works to support the upgrade of Wakehurst Parkway between Seaforth and Warringah Road at Frenchs Forest. Occasional night time deliveries to the site may also be required.

For any work outside the standard construction hours, the community will be notified in advance.

Traffic/vehicle movements

Access to site will be via Wakehurst Parkway and Warringah Road.

At our construction peak, there will be around 95 heavy vehicle movements and 180 light vehicle movements per day (a vehicle travelling in and out of the site is counted as two movements). The combined activity for all Wakehurst Parkway temporary sites will increase traffic in the area by 4 per cent during peak construction. Overall, this is a small increase to current traffic volumes.
