### Temporary kiosk energisation

14 June 2022

Dear Neighbour

The NSW Government is delivering a new Sydney Fish Market which will retain its authentic experience and strengthen its position as one of Australia's leading tourist destinations.

#### Upcoming work - Temporary substation kiosk energisation

The temporary substation kiosk which will provide power to the construction site is now ready for energisation.

On **Tuesday 21<sup>st</sup> June, out of hours works** will be undertaken **between 6:00pm-5:00am** to energise the temporary substation kiosk. This work will be undertaken by Ausgrid and will include cable connection and commissioning works. Work has been scheduled as **night works** due to authority approvals and consideration for public safety.

On **Wednesday 22<sup>nd</sup> June, day works** will be undertaken between **10:00am-3:00pm** to finalise the cable connections and restore the pavement along Bellevue Street.

The location of works is as follows (also refer to Figure 1 overleaf):

- Along the eastbound lanes of Bridge Road and the footpath along the construction site frontage between Glebe Foreshore Walk and Wentworth Park Road.
- Along the eastern footpath and parking lane of Bellevue St between Bridge Lane and Bridge Road

Please note that shift times are subject to authority approvals and weather.

#### How this affects you

Out of hours night work undertaken by Ausgrid on 21 June will be carried out between **6:00pm-5:00am**, with noisy works to be undertaken earlier in the shift. There is no saw-cutting or rock breaking required, but there will be a sucker truck present to remove groundwater from the joint bay pit on the Bellevue Street footpath.

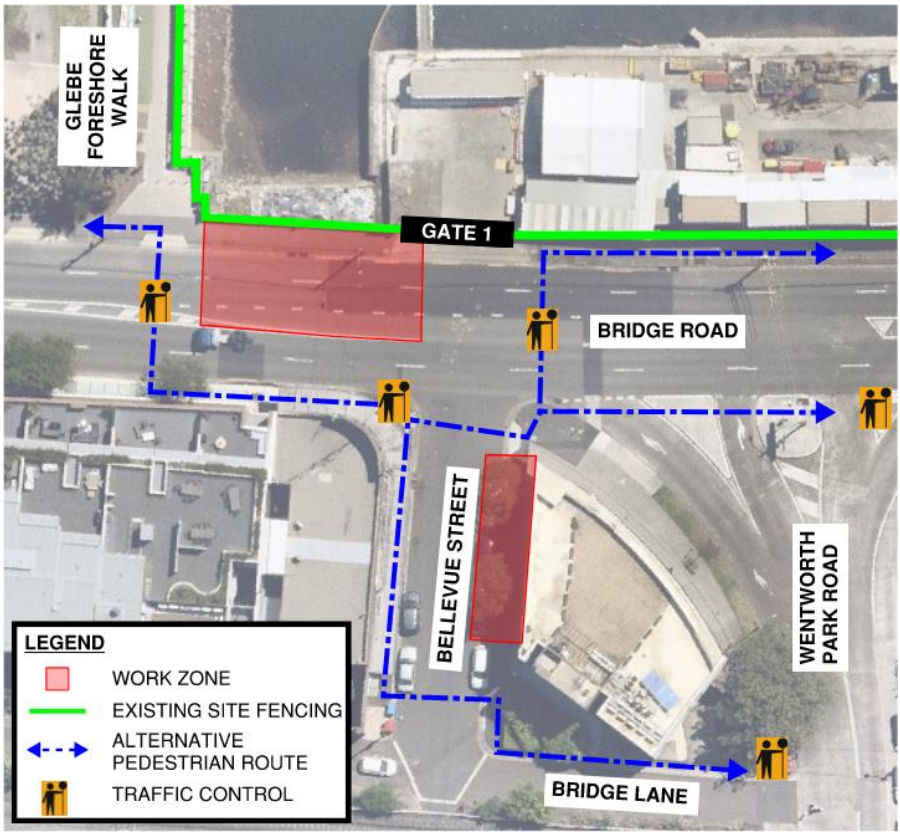

During this work, the following measures will be in place for traffic and pedestrians:

- Guiding vehicles and cyclists around the work zone with traffic control and signage.
- Providing alternative pedestrian routes with traffic control guidance. Footpaths will be maintained during works where possible, while temporary pedestrian crossings will be set up and managed by traffic controllers to safely guide pedestrians across the road.
