Site and utility investigations
Southport Light Rail Depot

The Queensland Government, in partnership with the Australian Government and the City of Gold Coast is delivering Gold Coast Light Rail Stage 3 (GCLR3), extending the light rail network by 6.7 kilometres from Broadbeach to Burleigh Heads, linking communities to business centres, shopping, dining, education and medical facilities.

This city-shaping project will support more than 760 jobs and cater to the Gold Coast's expected population growth in the coming decades.

Upgrades to the existing Southport light rail depot are required to cater for the five additional light rail vehicles to be added to the light rail network, as part of Stage 3.

From late-October 2021, John Holland will begin site establishment and investigation works at the Southport light rail depot (pictured on the next page). Site establishment and investigation works will continue until early November 2021.

What to expect

- Site mobilisation at Southport light rail depot, including the delivery of workforce amenities and plant.
- Underground utility investigations will commence at the Southport light rail depot.
- Investigations will involve the use of concrete cutters, non-destructive digging trucks and drilling machines to cut sections of the asphalt away.
- Environmental investigations will involve the use of a drilling machine to collect samples of soil and groundwater.
- CCTV inspections and cleaning will take place at various locations within the site boundary.

Timing

Site and utility investigations

- 6am to 6pm, Monday to Friday, from 25 October to 6 November 2021.

Note: wet weather or unforeseen circumstances may result in changes to the work schedule.
