

# M6 Stage 1

## Ongoing geotechnical & utility investigations at Brighton Le Sands, Kogarah, Monterey from Monday 1 November 2021

### About the M6 Stage 1

The M6 Stage 1 will connect President Avenue at Kogarah to the M8 at Arncliffe via a four kilometre tunnel, linking southern Sydney to the wider motorway network.

### Latest update

We previously advised you of our investigation activities at President Avenue from Monday 20 September to Monday 1 November. This notification is to let you know that our work will continue until Monday 13 December. Our geotechnical and utility investigations will involve both day and night work at these locations:

- O'Neill Street, Brighton Le Sands
- President Avenue, Civic Avenue, West Botany Street and Princes Highway, Kogarah
- O'Connell Street, Monterey

These investigations will inform the final design of the M6 Stage 1 tunnel.

### What does our work involve?

Our geotechnical work involves drilling into the ground to take soil samples to learn about ground conditions under the surface.

Our utility work involves digging into the ground to locate existing utilities under the surface, and using CCTV equipment to perform this task.

We will use a concrete cutting saw, ute rig, light vehicles, vacuum truck, compactor and hand tools to complete the work.

A map of our work area is shown over the page.

### Our work schedule

The investigations across these locations will take up to six weeks to complete from Monday 1 November to Monday 13 December.

Our standard construction work hours are:

- **7am to 6pm, Monday to Friday**
- **8am to 1pm, Saturday**

Our noisy night work will take place at these locations throughout November from:

- **7pm to 5am, Monday, Tuesday and Thursday nights**

The dates and timing of work are subject to change depending on the weather, site conditions and availability of parking spaces.

### How will our work affect you?

We will temporarily remove on street parking during the work. The project team will progressively occupy parking spaces by installing traffic cones as we move along the work area. Parking will be reinstated once work is complete.

We will notify residents impacted by parking removal 24 hours before work begins. Pedestrian routes and access to properties will be maintained.

For the safety of our workers and the community, we will make temporary traffic changes during our work. Please follow our traffic signs and the directions of our traffic controllers.

Our work is expected to create some noise when we are cutting into concrete and using a vacuum truck. We will reduce our noise by turning off equipment when not in use and installing noise blankets around our work areas, where possible.

## How are we keeping our sites safe?

The safety and wellbeing of the wider community and our workers is our highest priority. We are working closely with our contractors to make sure COVID safe plans are in place and we are following current NSW Government Public Health Orders.

## How will we continue to communicate with you?

We will continue to inform the community in advance about work activities via community notifications delivered to your letterbox.

If at short notice there is a change to the timing of our work, we will provide updates on the M6 Stage 1 interactive portal.

We understand some activities may cause disruption to the local community and businesses and we aim to complete this work as quickly as possible. We thank you for your patience as we undertake this important work.

## More information?
