

Western Harbour Tunnel

Temporary ferry service disruption, Birchgrove Wharf

Transport for NSW | March 2022

Early work

Geotechnical investigations and installation of groundwater monitoring wells

Early work activities including geotechnical investigations on land and in Sydney Harbour, and installation of groundwater monitoring wells commenced in February and are progressing. This work helps to inform the detailed design for the tunnel alignment. This work is expected to be completed by late April 2022 (weather permitting). Regular groundwater monitoring will continue to take place for around two years.

Temporary ferry service disruption, Birchgrove Wharf

To safely carry out marine investigations close to Birchgrove Wharf, the **F8 (Cockatoo Island to Circular Quay)** service will not be able to stop at Birchgrove Wharf from Monday 11 April 2022 for around three weeks. See map of work area below.

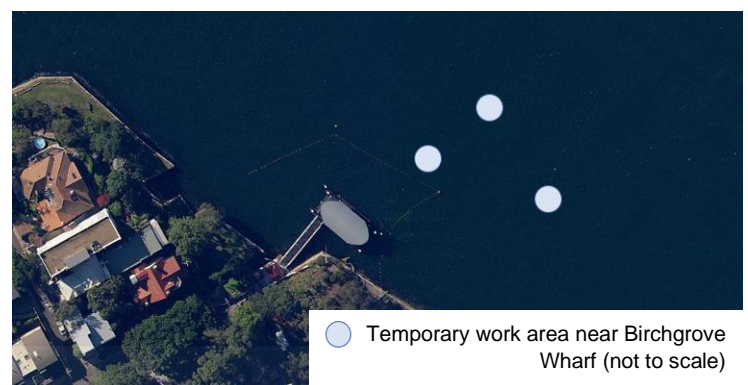

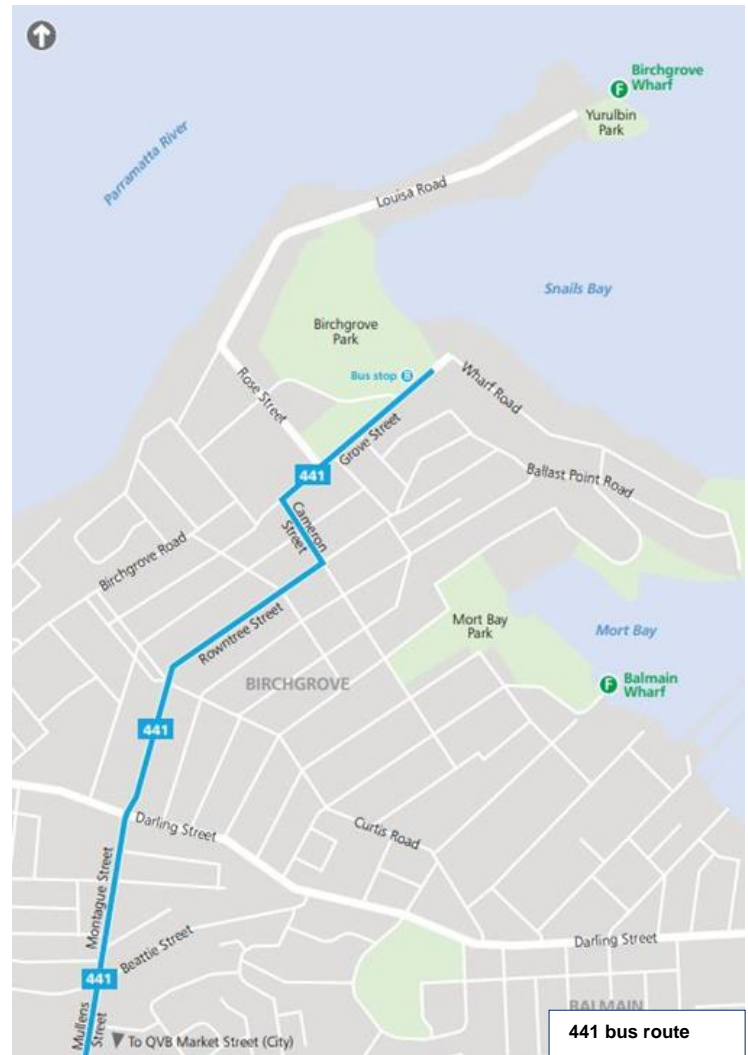

You are able to catch the 441 bus service (see map opposite), operating between Grove Street, Birchgrove and the QVB, to the city or to connect with other bus services on Victoria Road. The nearest wharf is Balmain Wharf.

This work is being carried out during the school holidays to minimise impacts to students that also use the ferry service from this location.

All efforts will be made to resume ferry services as soon as possible and we thank customers in advance for their patience.

PLAN YOUR TRIP

To plan ahead please visit transportnsw.info for any information about your local ferry and bus services.

Getting to know your community survey

We are continuing to build our knowledge of your community and surrounding local businesses to help us identify further ways to minimise impacts during construction. We would like to invite you to participate in a short survey so we have a greater understanding of you and your circumstances.

The information from the survey will be collated and used to identify themes and trends which we will consider when planning our work. It will also help us understand if you have a unique situation we should be aware of. The survey is voluntary and you may choose to only complete parts of it. It should take around five minutes to complete.

If you have any questions relating to this survey or the Western Harbour Tunnel and Warringah Freeway Upgrade project, please visit our portal or contact us for more information.

To complete the survey, please use the QR code or visit: nswroads.work/whcommunitysurvey

Other project in your area

We recognise there are other major infrastructure projects in this area and are working closely with other projects in the area. We will continue to coordinate with the Rozelle Interchange and Sydney Metro project teams to manage the cumulative impact.
