

Bridge Road Works – Stage 3

To provide access to the new Sydney Fish Market (nSFM), we will upgrade Bridge Road between the intersections of Wattle Street and Wentworth Park Road. Remaining Stage 2B works will be completed concurrently with Stage 3.

Stage 3 key activities – commencing 5 April 2025

- Pavement resurfacing and asphalt works.
- Commissioning of permanent streetlighting and traffic signals.
- Finishing works including signage and line marking.

Work will be carried out through a combination of regular day shifts, night shifts, and scheduled weekend shutdowns (weather permitting):

- Weekend 1: 5 April 2025
- Weekend 2: Early May

How will this affect you and how will we manage it?

- Work will commence on 5 April 2025 and take several weeks.
- Lane closures, pedestrian and cyclist diversions will be necessary at times throughout this work. Guidance will be in place to safely direct and divert motorists, cyclists, and pedestrians around work zones.
- Works will include milling (removing the existing road surface) and sheeting (laying down a new layer of asphalt).
- During night works, the noisiest activities will be undertaken prior to 12am where possible.
- Measures will be in place to limit noise on site where possible and careful scheduling of high-impact activities.
