

# M6 Stage 1

## Night work for utility and geotechnical investigations at Brighton Le Sands, Kogarah, Monterey and Rockdale from Monday 11 October 2021

### About the M6 Stage 1

The M6 Stage 1 will connect President Avenue at Kogarah to the M8 at Arncliffe via a four kilometre tunnel, linking southern Sydney to the wider motorway network.

### Latest update

Between Monday 11 October and Thursday 28 October, we will continue utility and geotechnical investigations at:

- President Avenue, Cross Street and Cross Lane, Kogarah
- West Botany Street and French Street, Rockdale
- Lachal Avenue, Traynor Avenue, Oakdale Avenue, Civic Avenue and Moorefield Avenue, Kogarah
- O'Neil Street and Crawford Road, Brighton Le Sands
- O'Connell Street, Monterey.

These investigations are being undertaken to inform the final design of the M6 Stage 1.

### Our work schedule

Our noisy work will take place up to three nights a week from 7pm to 5am on the following nights:

- Monday 11 October, Tuesday 12 October and Thursday 14 October
- Monday 18 October, Tuesday 19 October and Thursday 21 October
- Monday 25 October, Tuesday 26 October and Thursday 28 October.

The dates and timing of work are subject to change depending on the weather, site conditions

and availability of parking spaces. A map of our work area is shown over the page.

### What does our work involve?

Our work involves locating underground utility services using a ground penetrating radar and digging below the road surface.

Our geotechnical work involves drilling into the ground to take soil and rock core samples to learn about ground conditions under the surface.

We will use a concrete saw, a ute rig, a vacuum sucker truck, light vehicles and hand tools to complete the work.

### How will our work affect you?

Our work will create noise. We will aim to complete the noisiest work before midnight. We will endeavour to minimise the impact on nearby residents by turning off our machinery when not in use and using noise insulation blankets on our temporary fencing. We will also ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

For the safety of our workers and the community, we will need to make some traffic changes during our work. Please follow our traffic signs and directions of our traffic controllers. Access to properties will be maintained at all times.

### How are we keeping our sites safe?

The safety and wellbeing of the wider community and our workers is our highest priority. We are working closely with our contractors to make sure COVID safe plans are in place in line with NSW Government Public Health Orders.
