Southport Depot Site establishment works

From Tuesday 3 May 2022 we will commence site establishment of the Southport Depot.

As part of Gold Coast Light Rail Stage 3, upgrades to the existing Southport light rail depot are necessary. These upgrades include new light rail stabling tracks and maintenance facilities to cater for the five additional light rail vehicles to be added to the light rail network. These works are expected to be completed by Monday 16 May 2022.

What to expect

- Site establishment at Southport light rail depot, including the delivery of materials, and equipment.
- Delivery and installation of temporary site buildings, site fencing and services including sewer, water and electrical connections.
- Vegetation trimming to establish a safe clearance around new Energex connections. An arborist and wildlife specialist will be onsite during the works. See overleaf for location of tree trimming.
- Construction activities will involve saw-cutting and excavating using machinery and power tools.
- There will be some noise and disruption at times. Every effort will be made to minimise disruption for residents and businesses in close proximity to the project site.

Temporary traffic changes

- Access to the Southport Depot site will be via Michelin Street and Olympic Court.
- Increased vehicle movements around Michelin Street and Olympic Court can be expected during site establishment.

Timing

7:00am to 6:00pm, Monday to Friday and 8:00am to 1:00pm, Saturday. No works will occur on Public Holidays unless otherwise notified.

Note: wet weather or unforeseen circumstances may result in changes to the work schedule.

We appreciate your patience during these important works and will continue to update you as works progress.
