

M6 Stage 1

Utility investigations at Arncliffe and Banksia from Thursday 23 September 2021

About the M6 Stage 1

The M6 Stage 1 will connect President Avenue at Kogarah to the M8 at Arncliffe via a four kilometre tunnel, linking southern Sydney to the wider motorway network.

Latest update

Between Thursday 23 September and Friday 29 October, we will carry out utility investigations at:

- Marinea Street, Bellevue Street, Tantallon Lane and Terry Street, Arncliffe
- Short Street, Shaaron Court, Agonis Close, Lynwen Crescent, Monahan Avenue, Banksia

These investigations are being undertaken to prepare for further investigations which will inform the final design of the M6 Stage 1 tunnels.

What does our work involve?

Our work involves locating underground utility services using a ground penetrating radar and digging below the road surface.

We will use a concrete saw, light vehicles, a vacuum sucker truck and hand tools to complete the work.

Once the utility investigations are complete, we will return to your area for further investigations. A separate notification will be distributed about this work.

Our work schedule

Our work will take up to five days at each location to complete. Once the work is completed in your street, we will move to another location.

Our standard construction work hours are:

- **7am to 6pm, Monday to Friday**
- **8am to 1pm, Saturday**

The dates and timing of work are subject to change depending on the weather, site conditions and availability of parking spaces. Maps of our work areas are shown over the page.

How will our work affect you?

For the safety of our workers and the community, we will need to temporarily close some street parking and make some traffic changes during our work. Please follow our traffic signs and the directions of our traffic controllers. Access to properties will be maintained at all times.

Our work will create some noise. We will help to reduce noise by turning off our machinery when not in use. We will also ensure compliance with strict environmental conditions relating to noise, vibration and dust management.

How are we keeping our sites safe?

The safety and wellbeing of the wider community and our workers is our highest priority. We are working closely with our contractors to make sure COVID safe plans are in place including wearing masks and following appropriate hygiene and social distancing measures.

If at short notice NSW Government Health Orders change the timing of our work, we will provide updates on the M6 Stage 1 interactive portal. We encourage you to subscribe to our email distribution list to receive timely updates.
