

Your pathway to a career in the clean energy sector

ACEREZ, a partnership of ACCIONA, COBRA and Endeavour Energy, has been appointed network operator to design, build, finance, operate and maintain the Central-West Orana Renewable Energy Zone (REZ) transmission network.

This includes new high-capacity transmission lines, energy hubs and supporting infrastructure to transfer power generated by solar and wind farms to NSW's electricity consumers.

The new transmission infrastructure will initially unlock up to 4.5 gigawatts of new network capacity, providing a reliable supply of clean and affordable electricity for households and businesses across NSW.

Why is the project needed?

Coal-fired power stations are coming to the end of their operational life and will retire over the coming decade. New transmission infrastructure is needed to connect renewable energy to the NSW transmission network.

The Central-West Orana REZ and new transmission infrastructure will help deliver more affordable, cleaner and reliable energy while also supporting new local jobs and business opportunities during construction and operation.

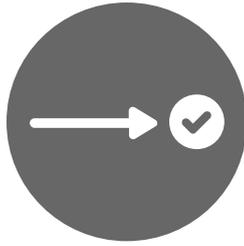

The new transmission infrastructure will connect renewable energy sources in the REZ to the National Electricity Market, helping reduce carbon emissions and support NSW's and Australia's net zero targets.

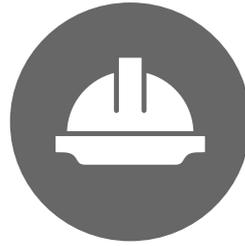

Your entry pathways into renewable energy

School based traineeships and apprenticeships or TVET

Direct entry

Pre-trade programs

Cadetships and graduate programs

Apprenticeships and trainee programs

University

Vocational education and training

Non-construction jobs

For example:

Accountant

Automotive mechanic

Commercial cook

Community engagement specialist

Engineer

Environmental management specialist

Human resource specialist

Legal and contract management specialist

And more...

Construction jobs

For example:

Concreter and form worker

Crane and drone operator

Electrician

Explosive technician

Plant operator

Scaffolder

Steel fixer

Welder

And more...
