

Ongoing construction of the shared pedestrian and cyclist pathway between Bruce Street and Bestic Street

M6 Stage 1

October 2025

Transport for NSW acknowledges the Bidjigal, Dharawal, Gweagal and Gadigal clans of the Eora Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

As part of the M6 Stage 1 project, construction of the shared pedestrian and cyclist pathway continues in October 2025.

When we'll be working

Our standard work hours are from **7am to 6pm, Monday to Friday and 8am to 6pm, Saturday**. We are approved to work out-of-hours from **6pm to 7am**, for up to three weeknights per week, no more than two consecutive weeknights and a maximum of 10 nights per month.

Night work will take place between Wednesday 1 and Friday 31 October, 2025, weather permitting, on the following nights:

1, 2, 8, 9, 15, 16, 22, 23, 29 and 30 October.

If work is delayed due to weather or site conditions, it will be carried out on the next available night shift.

What work are we doing?

Our day work will include:

- ongoing formwork and concrete work for the shared pathway, bridge structure and boardwalks, including boardwalk installation and fence adjustment

- excavating to install underground conduits and lighting poles for future pathway lighting along the alignment, includes setting up electrical boards and connecting wires
- constructing the foundation for the pedestrian and cyclist pathway between Bruce Street and Bestic Street
- investigating existing underground services.
- delivering and relocating oversized plant equipment
- maintaining environmental controls to manage erosion and sediment
- delivering and removing of materials such as gravel, sandstone, concrete, reinforcement, ongoing earthworks, tree pruning, vegetation and tree removal
- continuing landscaping work, including planting native plant species and new trees as per the Urban Design and Landscape Plan
- continuing work to upgrade the crossings at Bruce Street, including conduit installation, cutting concrete, excavating and trenching.

Our out of hours work will include:

- continuing work to upgrade the crossing at West Botany Street, including cutting concrete, excavating and trenching in preparation for the installation of traffic lights
- commencing work to upgrade the crossing at Bestic Street, including cutting concrete, excavating and trenching.

What will this mean for you?

No stopping zones will be implemented 30 metres on each side of the Bruce Street crossing and 25 metres on each side of the West Botany Street crossing.

During our work, you may notice:

- vehicles entering site via Bruce Street, West Botany Street, Bestic Street and Francis Avenue
- intermittent periods of vibration from the use of compactors and rollers, and noise from machinery and equipment, and
- temporary traffic and pedestrian changes when we are working close to the footpath or road, such as temporary lane closures on West Botany Street near our site entry.

November and December out of hours work

Continuing work to upgrade crossings on Bruce Street, Bestic Street and West Botany Street, including the installation of traffic lights at West

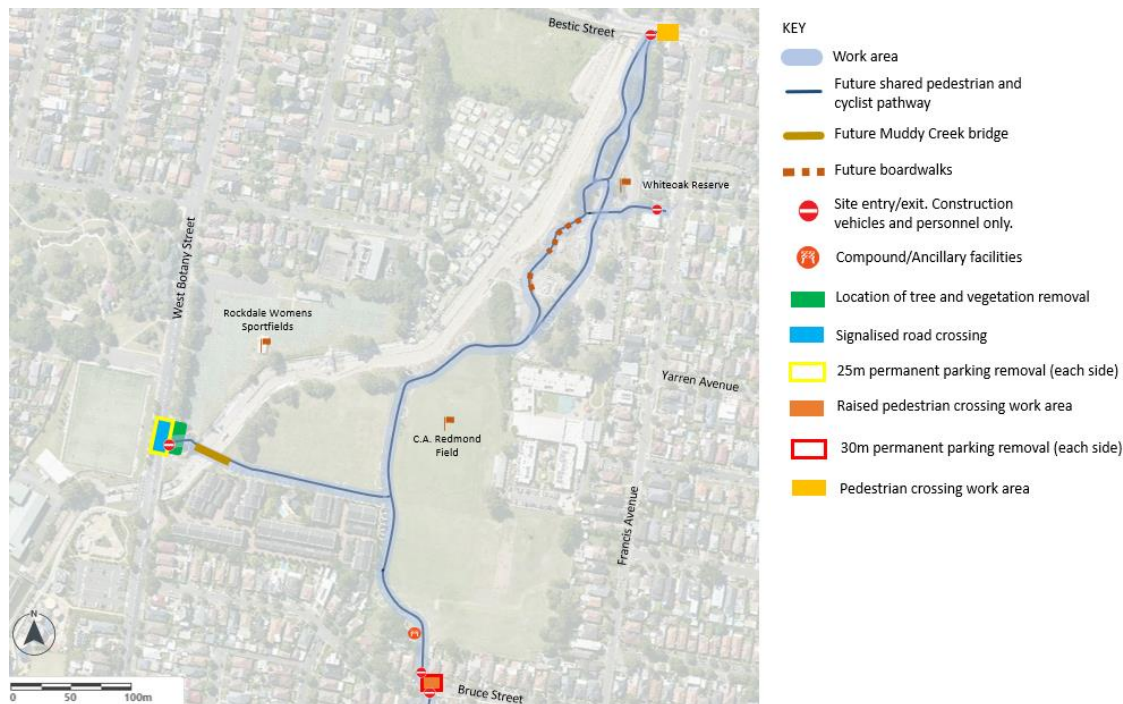

Botany Street and associated works such as pram ramps and pavement.

Managing our impacts

We will manage dust by using a water cart and manage noise by using squawkers instead of beepers on vehicles and turning off equipment and vehicles when they are not being used. We monitor dust and noise levels to measure our impact to the local community. Respite for one hour will occur every three hours during high impact day activities. High impact work on Saturday will finish by 1pm.

Please follow our traffic signs and the directions of traffic control. Boom gates, barriers and stop-slow traffic management will be in place to ensure the safety of workers and the community when working on or near live traffic. Partial road closures, temporary parking removal and pedestrian diversions may be in place to facilitate works.
