

Work on Elizabeth Drive, Wallgrove Road, Cecil Road in Cecil Park, and the M7 Motorway

M7-M12 Integration project

May 2024

We acknowledge the Dharug people as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

The M7-M12 Integration project will support future development growth in Western Sydney by improving travel times and congestion. Once complete, the project will provide direct access to commercial and residential hubs, and the new Western Sydney International Airport.

Come and meet the project team

We will be participating in Blacktown City Councils **Streets Alive** event.

Drop-in, say hello and learn more about the M7-M12 Integration project.

When and Where:

Saturday 25 May 2024,
9am-4pm.

Main Street, Campbell Street and Flushcombe Road, Blacktown

No need to RSVP, simply drop in anytime!

What work are we doing?

We will be working at the Elizabeth Drive Connection (EDC), including along Elizabeth Drive, Wallgrove Road, the realigned Wallgrove Road, and Cecil Road in Cecil Park and Cecil Hills. We will also be working along the M7 Motorway, including ramps and in the adjacent M7 shared path between the M5 Motorway, Prestons and Richmond Road, Oakhurst/Glendenning. We will work between **Wednesday 1 May** and **Friday 31 May 2024** weather permitting.

Our work includes:

- geotechnical and environmental investigations and assessments
- installing erosion and sediment controls
- stormwater drainage, culvert and fauna crossing construction
- identifying environmentally sensitive areas
- utilities investigation, installation and relocation (we will notify you in advance if this work will cause any service disruptions)
- inspecting roads, including condition surveys and traffic assessments
- relocating, installing and upgrading static and electronic traffic lights
- continuing vegetation clearing and removal of topsoil
- pavement and haul road construction, road resurfacing and asphalt placement

- bridge foundation work including piling, formwork and concrete pours across all bridges
- construction of retaining walls
- installing, adjusting and removal of safety barriers
- establishing site compounds and work areas including building temporary piling pads and creek crossings for machinery and site access
- delivery of machinery, equipment and materials to site compounds and project areas
- bulk earthworks, including excavation and hauling of materials
- ongoing concrete pours to support construction activities

Help us plan for future night work

For the safety of drivers, pedestrians and our workers, some work will need to take place at night. Some activities close to residential areas may be noisy. Impacted residents will be notified separately.

We invite your feedback on how this may affect you and what we can do to minimise our impacts.

Our work schedule

Standard work hours are between **7am and 6pm, Monday to Friday** and between **8am and 6pm on Saturdays**.

Our out-of-hours work hours are **6pm to 7am, Monday to Friday morning** and **6pm Friday to 8am Saturday morning**. Work may occur outside of these hours, subject to additional approval. We will not complete noisy work more than two (2) nights in a row and three (3) nights in a week or ten (10) nights in a month in the same location.

What equipment will be used?

We will be using vacuum excavation trucks, road saws, specialised ground penetrating equipment, cranes and lifting equipment, elevated work platforms, chainsaws, excavators, mulchers, compactors, watercarts, profilers, sweepers, light and heavy vehicles, lighting towers, saws, dozers, scrapers, slashers, vibratory rollers, pump and generators, line marking trucks, water blasting machines, piling rigs, hand tools, power tools and traffic control.

What will this mean for you?

There will be temporary traffic changes including lane and ramp closures, detours and reduced speed limits near our works and nearby local roads. Road users will be notified of temporary traffic changes via variable messaging system and on-site signage.

The speed limit on the M7 Motorway has now been reduced to 80km/h where signposted. This speed reduction will remain in place until project completion in 2026.

For safety reasons during construction, bike riders are not permitted on the M7 Motorway. There will be reduced widths and temporary closures along sections of the M7 Motorway shared user path. Signage will be installed advising bike riders and pedestrians of changes.

Managing our impacts

During our work you will see an increase in activity in the area as workers move around the site. Some work close to residential areas may be noisy. We will take every possible step to minimise noise, such as scheduling any noisy work earlier in the evening during night work, switching off equipment when not in use and using non-tonal reversing beepers.

Please keep to the speed limits and follow the direction of traffic controllers and signs. For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW app.

M7 Motorway ramp and shared path closures

There will be occasional night time ramp closures next to work areas at the locations outlined in the table below.

Dates and locations are subject to approval. Road users will be notified via variable messaging system boards (VMS).

Location of ramp closures	Southbound		Northbound	
	on	off	on	off
Elizabeth Drive	X	X		X
Wallgrove Road			X	

There will also be shared path closures including:

- Reedy Creek under M7 Motorway bridges
- Great Western Highway under M7 Motorway bridges.

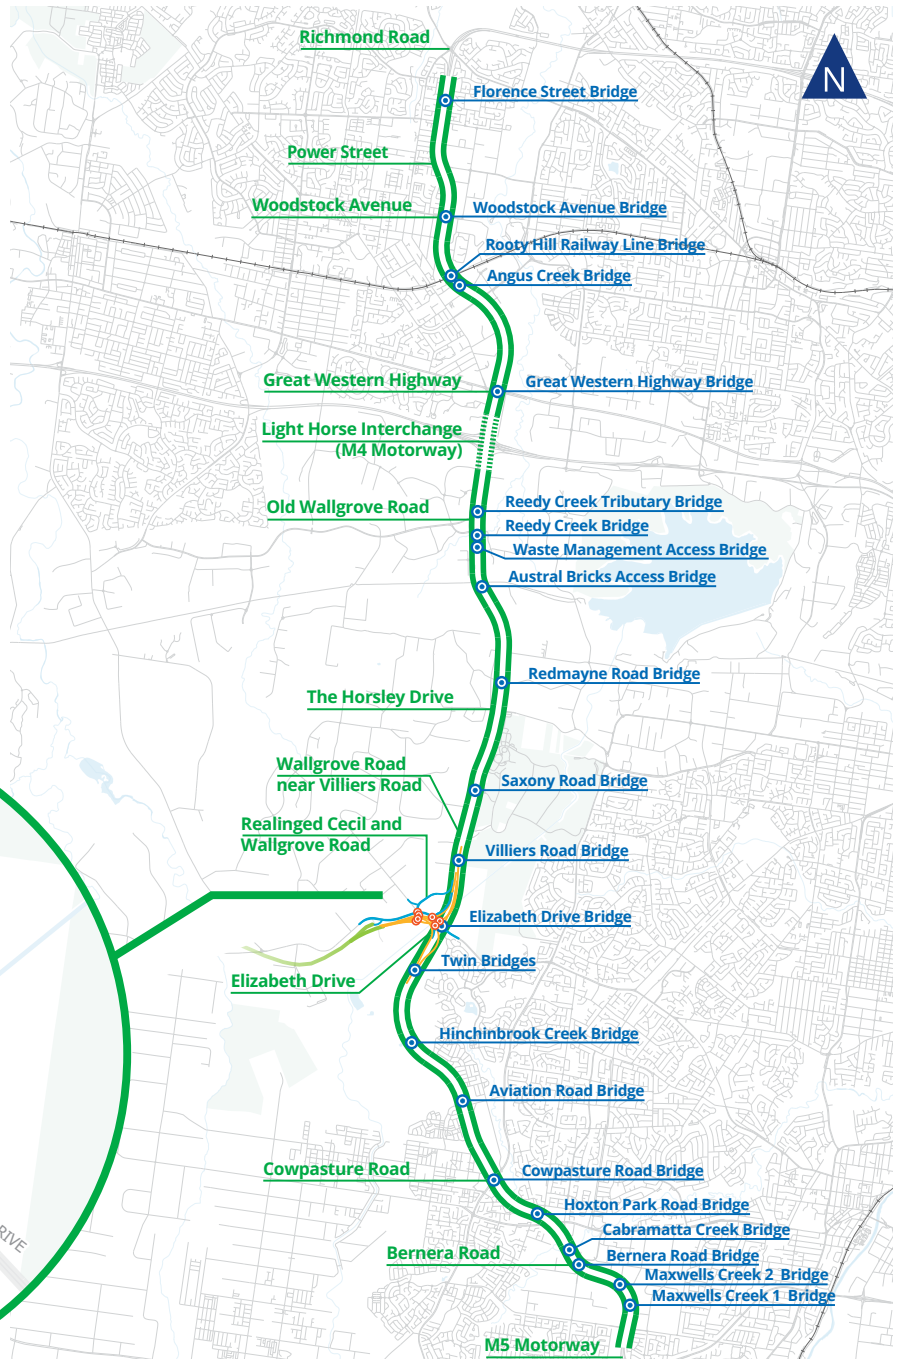

Please note, noise levels and their impacts are subject to the location and distance of the property from the work site. Some of this work will be moderate to noisy and be similar to either a washing machine or a vacuum cleaner.

Location of Works	Out of hours activities (moderate - noisy)
<p>Elizabeth Drive Connection</p> <ul style="list-style-type: none"> - Elizabeth Drive - Wallgrove Road - Cecil Road - Realigned Wallgrove Road - Tank Road - M7 Motorway including ramps 	<ul style="list-style-type: none"> - ongoing concrete pours to support construction activities - road surface work including traffic lane realignment, temporary pavement, asphalt placement and haul road construction - barrier and signage installation, maintenance and removal - site establishment including removal of topsoil, installation of access gates, temporary pavement, and access road within the median - vegetation clearing - delivery of machinery, equipment and materials to site compounds within median - bridge foundation work including site establishment, piling, formwork, ground stabilisation and concrete pours - geotechnical and environmental investigations and assessments - utilities investigation, installation and relocation (we will notify you in advance if this work will cause any service disruptions)
