BUILDING OUR FUTURE

Transport for NSW

M12 Motorway early work starting

Community Notification | September 2021

M12 early works site compound 2778 The Northern Road, Luddenham

The Australian and NSW governments are building the M12 Motorway to provide direct access to the Western Sydney International Airport at Badgerys Creek and connection to Sydney’s motorway network.

Transport for NSW has received Federal and State government approval to construct the M12 Motorway. Early works for the project will commence in late September 2021 for around six months with the main construction works to commence in 2022.

Early work will include:

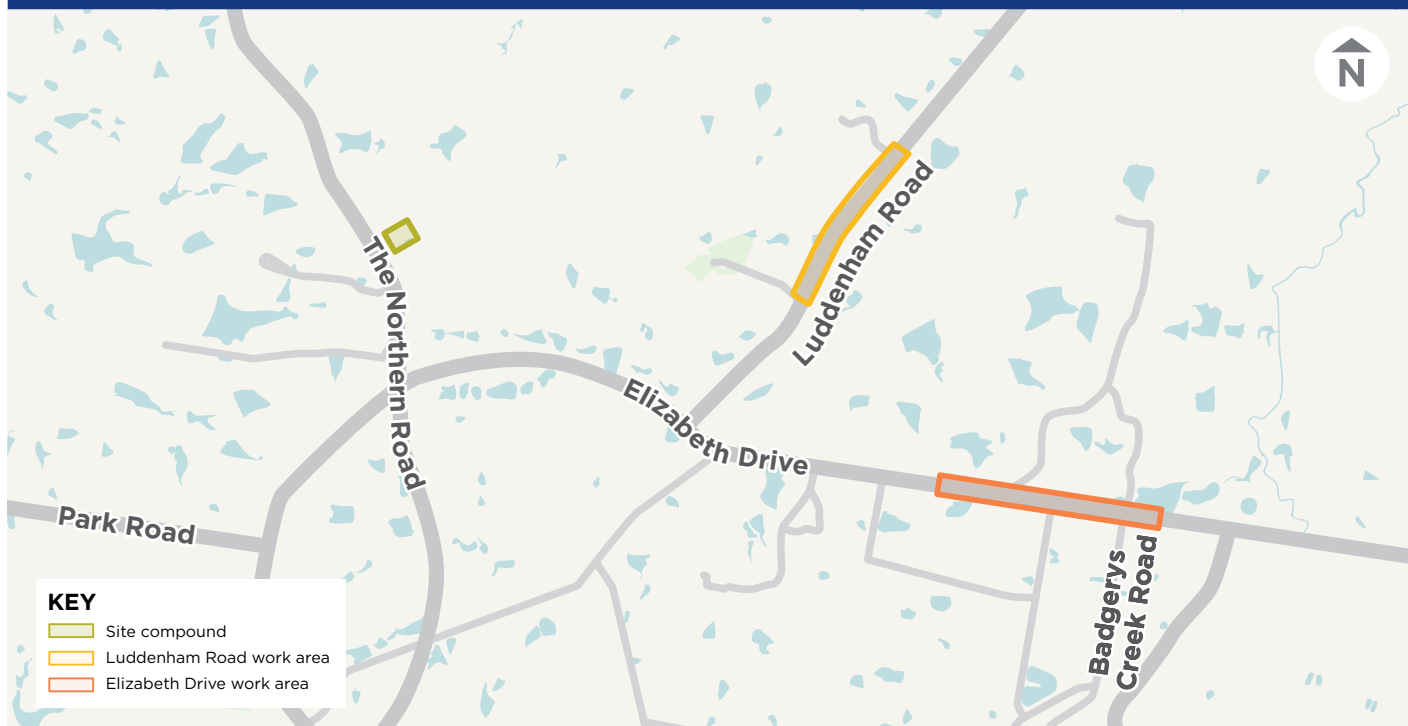

- Site compound set up:
 - The establishment of a site compound at 2778 The Northern Road, Luddenham which will involve some excavation to allow setup of site sheds and areas for stockpile of materials and plant to be set up.
- Utility relocation work on:
 - Luddenham Road which will involve excavating trenches, installing conduits, backfill, pulling cables,

an electrical outage to make electrical connections and removal of redundant overhead lines. This work will take around one month to complete.

- Elizabeth Drive (in front of the airport site) which will result in a reduced speed limit from 80km/hr to 60km/hr and the placement of concrete barriers to protect both workers and motorists.

Work in this area will involve tree clearing at the southern verge on Elizabeth Drive, excavating trenches, under boring of Old Badgerys Creek Road and New Badgerys Creek Road, installation of conduits, backfill, pulling cables, an electrical outage to make electrical connections and removal of redundant overhead lines.

M12 Motorway early works map

How will the work affect you?

We will be on site **Monday to Friday** from **7am to 6pm** and some **Saturdays** from **8am to 1pm**. There are no night shifts currently planned, but we will update the community if night shifts are required.

Machinery used may include excavators, trucks, roller compactor, trench compactors, lifter borers, elevated work platforms, cable winches and drum trailers, vacuum truck (also known as a sucker truck) and directional drills. The use of this type of equipment will create additional noise in the area during the day.

Traffic changes

Work will be done under traffic control arrangements in Luddenham Road using a stop go arrangement.

The speed limit on Elizabeth Drive will be reduced from 80km/hr to 60km/hr within the work area in front of the airport. The majority of the early work on Elizabeth Drive will occur behind the barriers but there may be times where additional traffic control is required if work needs to occur outside the barriers.

Please keep to speed limits and follow the direction of traffic controllers and signs. For the latest traffic updates, you can call **132 701**, visit **livetraffic.com** or download the **Live Traffic NSW App**.
