

Landholder engagement

We have engaged with landholders across the project area since early 2020. In November 2021, the proposed route was identified, and after gaining feedback from landholders, stakeholders and communities, an updated proposed route was released in August 2022.

Landholder and community input has been collated and provided to the technical specialist working on the impact assessments for the Environmental Effects Statement (EES) which we are currently finalising for the project.

We remain committed to working closely with all landholders, neighbours, community members and other stakeholders through the assessment and subsequent phases of the project.

Any questions?

If you are a landholder with a property within the proposed route, your dedicated Land Liaison Officer will be your main point of contact for all matters relating to the project, the proposed route and your property. Contact details for your Land Liaison Officer can be provided by the project team.

If you have a property close to the proposed route and have any concerns, please contact our **Community Engagement team**.

Community support services

AusNet Services acknowledges the uncertainty and concern around the Western Renewables Link, particularly for potentially affected landowners and communities.

We encourage anyone struggling with challenges to their own, a friend or a family member's mental health and wellbeing, to contact one of the independent support providers listed below for free and confidential advice.
