

Landholder engagement

We have engaged with landholders across the project area since early 2020. In November 2021, the proposed route was identified, and we are currently preparing an Environment Effects Statement (EES) for the project. This includes ongoing consultation with landholders and surrounding landholders, comprehensive technical specialist studies and broader engagement with community members and other stakeholders.

Landholder and community input is collated and provided to the technical specialists working on the impact assessments for the EES, the proposed route, and design of the transmission line and associated infrastructure. The project team also consider all feedback provided to improve our communication and stakeholder engagement activities.

Any questions?

If you are a landholder with a property within the proposed route, your dedicated Land Liaison Officer will be your main point of contact for all matters relating to the project, the proposed route and your property. Contact details for your Land Liaison Officer can be provided by the project team.

If you have a property close to the proposed route and have any concerns, please contact the project's Community Engagement Team.

Community support services

AusNet Services acknowledges the uncertainty and concern around the Western Renewables Link, particularly for potentially affected landowners and communities.

We encourage anyone struggling with challenges to their own, a friend or a family member's mental health and wellbeing, to contact one of the independent support providers listed below for free and confidential advice.
